What is Patient-Initiated Follow-Up (PIFU)?

Patient initiated follow-up (PIFU) puts you, the patient, in control of when you are seen by the Bronchiectasis Team within the Respiratory department. It means spending less time attending hospital appointments, but still having access to clinical support when you need it.

If your condition is stable, you may not find it helpful to attend regular outpatient appointments scheduled by the hospital. Sometimes, these appointments may not result in any change to your treatment, but you'll have spent time and energy putting arrangements in place to attend your appointment. Your condition may flare up in between regular booked appointments and it's at this point you really do need our input. With PIFU, you can get advice from your clinical team, who may suggest an appointment is required.

You initiate the follow-up appointment, instead of the hospital. Which is why this process is called patient-initiated follow-up (PIFU).

For all other concerns, or if you are feeling unwell, your GP will remain your first point of contact.

How will I know if I'm suitable for PIFU?

The Bronchiectasis team will tell you if your condition is now suitable for PIFU, instead of regular appointments scheduled by the hospital.

It is entirely your decision. You can continue with regular appointments if you want to. Your clinician will have advised you about the PIFU process and given you this patient leaflet to support you.

When should I call for a PIFU?

You should call if you are having problems with the “Trigger issues” listed below

PIFU is not a replacement for urgent medical advice. If you require urgent medical advice, you should contact your GP, NHS 111, your local walk-in centre or, if you are really unwell, your local Emergency Department (A&E).

How will I book a patient initiated appointment?

This is a quick and easy process.

If you have any of the following “Trigger Issues”, just follow the steps below and the team will help you.

“Trigger Issues”

- Chest infection with no symptomatic improvement after two weeks of oral antibiotics
- Two separate chest infections in a 6-month period or three separate chest infection within 12 months
- Struggling to clear sputum efficiently
- Concerns with your current bronchiectasis therapy (including intolerance and side effects with treatment or device issues)
- A significant change in exercise tolerance or breathlessness

5 easy steps:

1. Call or email the bronchiectasis team

PIFU direct tel: 01392 408734 (For Dr Dobson); 01392 402827 (For Dr Mitchelmore)
or Email: rde-tr.respiratorypifu@nhs.net

If you speak to someone explain that you are calling for PIFU input. They will ask the following questions:

-Are you struggling to clear your phlegm? YES/NO

-Are you struggling with recurrent chest infections? YES/NO. If “yes” how many in last 6 months

-Are you struggling with an infection which has not improved with antibiotics?
YES/NO

-Do you have any concerns about your therapies? YES/NO. If “Yes”, which one(s)

-How far can you walk at a steady pace without stopping?

If you email, you will receive an automatic reply asking you to email back with the answers to these questions.

If you need to leave a message when you call, please leave the following information:

- Your full name and date of birth
- Your hospital number and/or NHS number
- A telephone number so we can call you back during our opening hours
- Leave your answers to the following questions:

-Are you struggling to clear your phlegm? YES/NO

-Are you struggling with recurrent chest infections? YES/NO. If “yes” how many in last 6 months

-Are you struggling with an infection which has not improved with antibiotics? YES/NO

-Do you have any concerns about your therapies? YES/NO. If “Yes”, which one(s)

-How far can you walk at a steady pace without stopping?

2. The team will review your concerns and decide whether you need immediate clinical advice for your symptoms or if you need an appointment.
3. If the team think you need an appointment, we will contact you to agree an appointment date and time. Within 3 working days we will let you know when the appointment will be.
4. Attend your clinic appointment.

Will you still be looking after me if I’m on PIFU and don’t initiate an appointment?

Yes, we will. We will send you reminder letters at intervals about the pathway. For some patients we may also send specific symptom questionnaires and pots for sputum samples. If we have not heard from you after 4 years, we will re-review your notes and decide if to arrange an appointment or an advice letter and to come off the PIFU pathway

What if I am worried and change my mind about this style of follow-up?

Just tell us and we will go back to booking regular hospital appointments for you. Our team are happy to discuss any concerns with you.

PALS

The Patient Advice and Liaison Service (PALS) ensures that the NHS listens to patients, relative, carers and friends, answers questions and resolves concerns as quickly as possible. If you have a query or concern call 01392 402093 between 9.30am – 4.30pm or email rde-tr.PALS@nhs.net. You can also visit the PALS department in person at the Royal Devon and Exeter Hospital.

Have your say

The Royal Devon & Exeter NHS Foundation Trust aims to provide high quality services. However, please tell us when something could be improved. If you have a comment or compliment about a service or treatment, please raise your comments with a member of staff or the PALS team in the first instance.
